Senior Engineer with 8+ years of experience building and scaling distributed systems for real-time platforms, financial systems, and high-throughput applications. Expertise in designing resilient microservices, event-driven architectures, and low-latency APIs handling large-scale concurrent workloads. Proven track record of delivering reliable, observable, and highly available systems across AWS, Azure, and GCP.

SKILLS

Backend

GoLang, .NET Core (C#), Node js, Python, C++

Cloud & Infra

Docker, Kubernetes, AWS, Azure, Google Cloud, Jenkins, Perforce, Prometheus, Grafana, Jaeger

Databases

MongoDB, PostgreSQL, MySQL, Redis, CosmosDB/DynamoDB, Neo4j

Frontend

React, Angular, TypeScript, JavaScript, HTML5, SASS/SCSS/CSS3

Tools & Others

Git, JIRA, NGINX, Sitecore, Unreal Engine, Blender, GIMP, Reaper

PROFESSIONAL EXPERIENCE

Sumo Digital Ltd , Senior Programmer

11/2022 – 04/2025

Designed and built scalable backend systems powering real-time, high-concurrency applications.

Pune/Bangalore, India

Key Contributions:

- Architected and implemented **low-latency distributed services** for real-time state management and synchronization
- Designed **ranking and scoring systems** handling continuous updates and concurrent transactions
- Built backend services for:
 - Digital Wallets and virtual transaction systems
 - User state management and session handling
 - Rule-based reward and entitlement systems
- Enabled **cross-platform distributed coordination** across multiple clients and services
- Developed **event-driven telemetry pipelines** for system monitoring and analytics
- Built internal tools for:
 - Data inspection and debugging
 - Dynamic configuration and feature control (LiveOps-style systems)
- Collaborated with DevOps to design and maintain **cloud-native deployment pipelines**

Impact:

- Improved system scalability and flexibility for handling real-time workloads
- Reduced operational overhead through better observability and internal tooling
- Enabled dynamic configuration updates without downtime

GoLang, .Net Core (C#), C++, Python, Unreal Engine, ImGUI, NodeJs, Redis, Google Cloud, Perforce, Azure DevOps, Docker and, Proprietary Tools, Cloud Services/DB & Engines

CoffeeBeans Consulting LLP

09/2020 – 10/2022

Senior/Lead Engineer - Shoptype - Marketplace Platform

Bangalore, India

- **Led technical decision making and implementations** across **Frontend** and **Backend** on a community-powered network/marketplace enabling shopping, content sharing, and revenue generation for various user groups (shoppers, influencers, brands, etc.).
- Designed and implemented wallet, ledger and payment services and SDKs ensuring transactional consistency and auditability.
- Built microservices handling financial transactions with idempotency and failure recovery mechanisms.
- Designed scalable Backend architecture using **Kafka** and **PostgreSQL** to support high-throughput marketplace operations.

GoLang, Apache Kafka, Neo4j, MongoDB, PostgreSQL, React, Redux, Typescript, GraphQL, Kubernetes, Jenkins, Nodejs, Javascript, Kibana, Elastic Email & Search, Git, JIRA, AWS, Docker, Kubernetes, Jenkins, HTML5, CSS, SEO

CoffeeBeans Consulting LLP

12/2019 – 08/2020

Senior Consultant - R4 - Unibiz Software Solutions Pvt Ltd

Bangalore, India

- Improved backend and frontend performance by **150–200%** through profiling and optimization
- Identified and resolved system bottlenecks, memory leaks, and inefficient workflows
- Enhanced observability using distributed tracing and monitoring tools

Skills/Tech/Experience : .NET Core (C#), React, Redux (Sagas), NGINX, NodeJS, Javascript, Typescript, MongoDB, Redis, Docker, Kubernetes, Git, JIRA, Visual Studio Profiler, JMeter, Jaeger Tracing, Prometheus, Grafana

CoffeeBeans Consulting LLP

12/2019 – 12/2019

Senior Engineer - Recommendation System & SaaS LMS Platform

Bangalore, India

- Contributed to backend and frontend systems for a **user behavior-based recommendation engine**
- Built responsive UI components and improved system performance
- Designed and developed a configurable **Learning Management System (LMS)** from scratch
- Integrated third-party content platforms and APIs

Skills/Tech/Experience : GoLang, JavaScript, ReactJS, NodeJS

Technovert/Tezo

06/2019 – 11/2019

Senior Engineer - Cox and Kings Ltd - Travel & Booking Platform

Mumbai, India

- Built scalable web platform for booking and reservation systems
- Integrated CRM systems and improved service orchestration

Keka , Full Stack Developer - Keka - HRMS Platform

12/2018 – 05/2019

- Led frontend modernization to improve performance and maintainability
- Built core engagement features for enterprise HR platform

Keka/Technovert/Tezo

06/2017 – 11/2018

Full Stack Developer - KekaHire - Applicant Tracking System

Hyderabad, India

- **Led Development** of a comprehensive Applicant Tracking System from scratch, **migrating a legacy AngularJS MVP to Angular 4 (Typescript) with a complete Frontend and Backend overhaul** for scalability and maintainability.
- **Implemented key features** such as resume parsing, CRON jobs, advanced role management, LinkedIn integration, interview scheduling, and email templating.

Skills/Tech/Experience : .NET (C#), WebAPI, ASP.NET MVC 5, MySQL, Angular 4–7, Azure CosmosDB, HTML5, CSS (SASS/SCSS), Bootstrap 4, TypeScript, jQuery, Git, IIS

PERSONAL PROJECTS

Decimated, Online Game - ZYKOTEK

Trailer

A side-scrolling shooter with a rich storyline featuring mutants, mercenaries, and a virus outbreak. Developed using **Adobe Flash CS3** with ActionScript/**Javascript**, and designed/animated with **Photoshop, Blender, and Flash** animation tools.

As **ZYKOTEK**, I have developed and released multiple other games independently before and since.

GetMeThat, Mobile Application

- Image recognition-based product discovery application
- Integrated external APIs for real-time search

Postonaut, VSCode Extension

- Open-source REST client extension for API testing and development
- Includes request history and debugging tools

Dodgket, PC Game

A full-fledged rocket dodging game developed entirely using **C++** for my **Senior Secondary School project** which made use of classes, data file handling for storing/retrieving/manipulating scores and **real time rendered animated graphics**.

AWARDS AND CERTIFICATIONS

Student Game of the Year, NASSCOM Gaming Forum Awards 2014, For Decimated

The game has 1B+ users/engagements till date

Mastering Multithreading Programming with Go (Golang) , Udemy

By James Cutajar

LLM Engineering, RAG, QLoRA, Agents , Udemy

By Ed Donner (In Progress)

Microservices Workshop, Coffeebeans Consulting LLP

Android Application Development, Skyfi Labs

EDUCATION

Bachelor of Engineering (Information Technology),

Rungta College of Engineering and Technology [!\[\]\(1ed10657a19f9137278430c48fd18626_img.jpg\)](#)

2013 – 2017

Bhilai, India
